Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: a control group and an experimental group. The control group received a standard diet and water, while the experimental group received a diet supplemented with 0.5% of the test substance. The subjects were divided into two subgroups: a control subgroup and an experimental subgroup. The control subgroup received a standard diet and water, while the experimental subgroup received a diet supplemented with 0.5% of the test substance. The subjects were divided into two subgroups: a control subgroup and an experimental subgroup. The control subgroup received a standard diet and water, while the experimental subgroup received a diet supplemented with 0.5% of the test substance.
